

Census Tract Designations for South Carolina Rural Infrastructure Authority Project Eligibility

The South Carolina Rural Infrastructure Authority (RIA) funds projects within distressed and least development counties, or Tier III and IV counties, as designated by the South Carolina Department of Revenue. Likewise, projects can be funded in census tracts (that meet the same distressed criteria) in Tier I or II counties, contingent on the census tracts being located in areas outside of an urbanized area as defined by the US Census Bureau.

Applicants can identify the census tract or tracts for their proposed projects using the maps at the following US Census Bureau website: http://www2.census.gov/geo/maps/dc10map/tract/st45_sc/.

The following table identifies which census tracts are eligible for projects under the guidelines of the RIA. The first two columns identify all census tracts within South Carolina. The third column in the table indicates if the tract is eligible for an RIA-funded project. If the tract is marked as “MAYBE”, only a portion of the census tract is eligible. Contact the RIA for an eligibility determination for projects in these tracts.
