Fiscal Year 2015-16 Accountability Report

SUBMISSION FORM

AGENCY MISSION

The mission of the Rural Infrastructure Authority (RIA) is to assist in financing qualified infrastructure projects that protect public health, comply with environmental quality standards and support economic opportunities.

AGENCY VISION

Helping communities prepare for economic opportunities that will lead to sustainability while protecting the quality of life.

Please state yes or no if the agency has any major or minor (internal or external) recommendations that would allow the agency to operate more effectively and efficiently.

**RESTRUCTURING
RECOMMENDATIONS:**

None

Please identify your agency's preferred contacts for this year's accountability report.

AGENCY'S DISCUSSION AND ANALYSIS

Current Efforts and Results

The Rural Infrastructure Authority (RIA) partners with communities to make investments in infrastructure (water, sewer and storm water facilities) designed to protect public health, address environmental quality standards and prepare for economic opportunities. RIA assistance helps close financial gaps for areas most in need of reliable infrastructure. The RIA works statewide to assist stakeholders through grant and loan resources for infrastructure.

Grant Programs

Financial assistance for qualified infrastructure projects is made available to eligible applicants in two competitive funding rounds which offer multiple opportunities to access funds. Funds are distributed through two program categories that are consistent with the agency mission and goals:

- **Basic Infrastructure** – address environmental concerns and public health issues.
- **Economic Infrastructure** – build local capacity to support economic development.

Following is a summary of accomplishments for Fiscal Year (FY) 2016 and also found in the Performance Measurement Template:

- The Board of Directors (Board) approved 22 new grants in 20 counties totaling \$14,697,430.
- The grants awarded will impact more than 26,000 customers and result in 2,287 new jobs.
- About 68% of projects funded were located in distressed or least developed counties, also defined as Tier III and IV counties by the SC Department of Revenue (DOR).
- Approximately 48% of funds awarded were for basic infrastructure needs to address health and environmental quality concerns while 52% will be used to build or improve infrastructure to support economic opportunities.
- RIA funds leveraged more than \$66 million dollars from local and other resources.

Since February 2013, 254 applications totaling more than \$86 million in funding requests were received and 139 projects totaling almost \$50 million were awarded. RIA funds have leveraged \$174 million in additional infrastructure investments. These projects contribute to making reliable infrastructure available to more than 98,000 residential customers and 6,185 business customers. Such infrastructure investments are designed to improve the quality of life, increase community sustainability and boost opportunities to create economic impact.

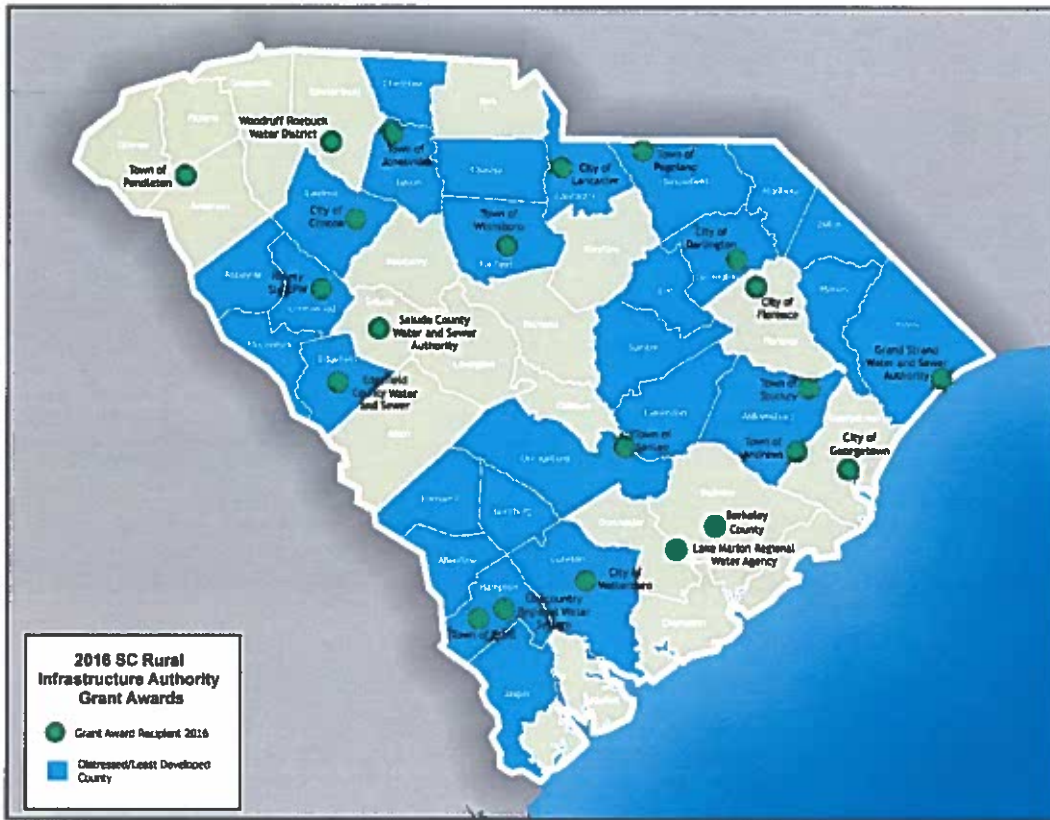

Figure 1: FY 16 RIA Grants Awarded by Location

Project Selection and Grants Management

The RIA Board has established a process for the submission of applications and selection of projects to be funded (see Figure 2.) The process involves technical assistance to potential applicants, preparation of a user-friendly application, and prioritization of requests based on published criteria for need, feasibility and impact. The RIA Board makes all funding decisions and applicants are notified of the results.

A grant agreement is issued for approved grants specifying the grant amount, the scope of the project and an 18 month grant period for completing the project. The grant agreement includes terms to ensure accountability for public funds such as financial management, audits, procurement, contracts, reports and record-keeping. The staff tracks progress and monitors all expenditures. RIA staff is assigned projects to provide technical assistance throughout the grant period.

State Revolving Loan Programs

The Restructuring Act of 2014 transferred the Office of Local Government (OLG) within the SC Budget and Control Board to the RIA this fiscal year. The OLG manages the financial and loan components of two federally capitalized State Revolving Funds (SRF) for Drinking Water and Clean Water (sewer). The SRF loan programs are available statewide. The State Fiscal Accountability Authority is the governing body for SRF financial policies and agreements.

The SRF has been annually capitalized by the US Environmental Protection Agency (EPA) since 1989. The state program is administered jointly with the SC Department of Health and Environmental Control (DHEC). DHEC prioritizes projects, handles the technical aspects of the program and ensures compliance with EPA requirements. OLG manages the financial component including credit reviews, loan agreements, closings and disbursement of funds as well as loan repayments and administration. Approximately \$320 million was available for loans this fiscal year.

Following is a summary of accomplishments for FY 2016:

- Updated financial policies to reflect market conditions including an interest rate reduction (1.8% for the standard rate) and extension of loan terms (up to 30 years) consistent with federal regulatory changes.
- An outreach and marketing plan was developed to improve communication with customers and enhance the demand for program loan funds.
- An SRF program and financial workshop was developed and jointly conducted with DHEC to enhance understanding of program requirements. Over 79 participants were trained.
- \$150 million loan applications in process and \$48.6 million loans closed.
- \$370 million in project requests were submitted for FY17 (which far exceeds the availability of funds.)

Factors Impacting Performance

While the RIA targeted grant funding for projects in distressed and least developed counties, the Board approved the qualification of projects in other areas including distressed census tracts located outside of urban areas or projects which share a service area with a currently approved US Department of Agriculture Rural Development (RD) infrastructure grant or a State Community Development Block Grant (CDBG) infrastructure grant. This expanded definition of distressed areas determined where financial assistance could be provided. To date, projects have been funded in 43 of the 46 counties statewide.

Because applications are generated at the local level, performance measures can be impacted by the number, type, location and quality of application requests that are received annually. Similarly, although it is recognized that leveraging increases overall impact, there is limited ability for distressed areas to generate additional funding for infrastructure.

In previous years, the Board suggested grant requests of \$350,000 and \$500,000 per project. Because a regional approach to infrastructure is encouraged when appropriate, the Board selected projects that would have significant community-wide impacts and that exceed \$500,000. As a result, fewer projects were funded this year.

AGENCY NAME:	Rural Infrastructure Authority		
AGENCY CODE:	P45	SECTION:	054

One of the RIA’s strategies is to serve as a resource for rural areas, whether the need is for technical or financial assistance. Information about all available resources is communicated to stakeholders through electronic outreach, workshop presentations and other media. Four workshops were held during the year and more than 400 participants were trained. In addition, one-on-one project development assistance is provided to potential applicants while current recipients receive help with administration and management of approved grants. While there will be an ongoing need for training, the number served through this type of assistance may become less as familiarity with the programs increase.

Risk Assessment and Mitigation Strategies

One of the biggest areas of concern is the deterioration of aging infrastructure systems. Much of the existing infrastructure is at least 50 years old and has reached the end of its useful life. Limited resources mean that budgets are stretched thin to cover the capital improvements needed. A lack of resources is the reason many communities are unable to properly operate and maintain the water, sewer and drainage systems that serve residents and businesses. A delay in making the necessary investments can result in higher costs, business and service disruptions and increased health and environmental risks. Access to reliable and affordable infrastructure serves as an important quality of life concern by protecting public health, improving environmental quality and encouraging economic opportunities. Significant investments will be needed to ensure that there is adequate capacity for future economic growth.

There are not enough funds to address all of the water and sewer infrastructure needs in the state. Thus it is important to leverage other federal and state funding programs with local funds to increase the impact and address the most serious problems.

The SC Infrastructure Funders Coordinating Committee, which is comprised of representatives from federal and state agencies, meets on a regular basis to address funding gaps, share best practices and provide coordinated technical assistance to potential applicants. A “one-stop” project development approach was created to help applicants identify appropriate resources for proposed projects. Representatives include the RIA, SC Department of Commerce, SC DHEC, US Department of Agriculture Rural Development, and the US Department of Commerce Economic Development Administration. It should be noted that the other funders administer federal programs with complex procedures and requirements. The State-funded RIA program provides the most flexible resource that can plug gaps in financing and bridge procedures so that these programs can be implemented together in the most efficient manner. By taking a collaborative approach and building partnerships, limited resources can be leveraged and maximized for the greatest return on investment.

Another way to utilize existing resources to address the problem is by encouraging regional solutions and partnerships, whenever feasible. When two or more communities can work collaboratively to provide water and sewer services, there can be greater economies of scale operationally and greater chance of protection of scarce environmental resources.

The General Assembly created the RIA and provided funds for statewide use in response to these concerns. By continuing to provide financial assistance for critical infrastructure needs, the state can help to mitigate the negative impacts of inadequate resources through the support of projects that will benefit residents and businesses.

Plans for Changes

There will be an increase in the funds available for grants in FY 2017. In 2016, the General Assembly approved funding for the Statewide Water and Sewer Fund to assist qualified infrastructure projects that would not otherwise be eligible under the RIA’s rural infrastructure fund programs. Statewide projects next year will be selected using the RIA’s existing procedures and guidelines.

With regard to the SRF loan program, there are plans to evaluate current policies and develop a more effective partnership with DHEC to improve coordination and provide quality services.

Agency Organization

The RIA is governed by a Board of Directors (Board) that includes six members who reside in or represent distressed and/or least developed counties. The Secretary of the SC Department of Commerce serves as Chairman. Through a strategic planning process, the Board develops an annual strategy for addressing infrastructure needs. The Board establishes programs, sets priorities, selects qualified projects to receive grant funds and reviews performance.

RIA is comprised of two offices – the Office of Grant Programs, which awards competitive state grants and the Office of Local Government, which manages the financial and loan components of the State Revolving Funds (SRF) for Drinking Water and Clean Water (sewer). The State Fiscal Accountability Authority is the oversight body for SRF financial program policies.

The RIA has an Executive Director and eight full time staff. In order to foster administrative collaboration, RIA contracts with the SC Department of Commerce to provide office space, legal, financial and human resources services. This agreements allow for more efficient use of staff and resources available to the RIA.

There are no restructuring recommendations.

Strategic Planning Template

Type	Goal	Item # Strat	Object	Associated Enterprise Objective	Description
G	1			PUBLIC INFRASTRUCTURE AND ECONOMIC DEVELOPMENT	PROVIDE FINANCIAL ASSISTANCE FOR CONSTRUCTING AND IMPROVING PUBLIC INFRASTRUCTURE.
S		1.1			Improve the quality of life through reliable infrastructure for communities.
O			1.1.1		Help communities meet environmental and regulatory standards for infrastructure.
O			1.1.2		Provide infrastructure to address other health and environmental concerns in communities.
O			1.1.3		Upgrade existing infrastructure that is deteriorated or has exceeded its useful life.
S		1.2			Build the infrastructure capacity necessary to support economic opportunities.
O			1.2.1		Improve system capacity to support existing and new businesses.
O			1.2.2		Prepare communities for economic development by providing infrastructure to serve publically owned industrial sites.
O			1.2.3		Provide infrastructure support for economic and job creation opportunities where there are funding gaps.
S		1.3			Enhance community sustainability by providing affordable financial options to make timely infrastructure investments.
O			1.3.1		Provide grant assistance to communities most in need.
O			1.3.2		Offer opportunities to access funds in a timely manner to address critical needs.
O			1.3.3		Provide low cost loans to qualified entities.
G	2			PUBLIC INFRASTRUCTURE AND ECONOMIC DEVELOPMENT	SERVE AS A RESOURCE FOR COMMUNITIES TO BUILD INFRASTRUCTURE CAPACITY.
S		2.1			Use RIA funds to leverage other resources for infrastructure improvements.
O			2.1.1		Coordinate policies and programs on a quarterly basis with other state and federal agencies.
O			2.1.2		Leverage infrastructure investments on a dollar for dollar basis to increase impact.
S		2.2			Provide clients with training and technical assistance in accessing resources and implementing projects.
O			2.2.1		Hold workshops to train potential applicants and grantees annually.
O			2.2.2		Conduct outreach and technical assistance as needed for applicants, grantees and stakeholders.
G	3			GOVERNMENT AND CITIZENS	MANAGE AGENCY ASSETS IN AN EFFECTIVE AND EFFICIENT MANNER TO ACHIEVE OBJECTIVES.
S		3.1			Implement the policies of the Board of Directors.
O			3.1.1		Conduct annual strategic planning and make resources available to address infrastructure needs.
O			3.1.2		Perform annual evaluation of performance.
S		3.2			Allocate and manage resources to achieve goals.
O			3.2.1		Conduct monthly budget and expenditure reviews.
O			3.2.2		Manage programs with no major audit findings.
O			3.2.3		Commit available funds to loans in a timely manner.
